NIGHT AND DAY CAMP IS LIFE SAVING STATION

These two women escaped. They are shown in the Night and Day Camp conducted by the St. Louis Society for the Relief and Prevention of Tuberculosis. They are among the fortunate ones because they knew how to take care of themselves when this great menace threatened them. They knew that the cure lies in plenty of fresh air, even if the temperature is away below freezing, sunlight, good food and rest under proper medical supervision. Tuberculosis is not only curable but is preventable as well.

The prevention lies largely in right living, in building up a strong bodily resistance. Eight out of ten persons are infected at some time in their lives, according to figures of the National Tuberculosis Association, the leading agency in the United States in the fight upon this disease. This organization is sponsor for the annual Red Cross Christmas Scal sale, from which the funds to carry on the work throughout the year are chiefly derived.

### RURALITES HAVE BIG HEALTH ADVANTAGE

Abundance of Fresh Air and the ages of 16 and 45. Sunlight Do Much to Check Ravages of Tuberculosis.

DANGER IN CLOSED WINDOWS.

National Tuberculosis Association, Which Sponsors the Annual Sale of Red Cross Christmas Scals, Reports 150,000 Deaths Each Year From the Disease.

People who live in the smaller towns | IS CURABLE AND PREVENTand on farms have a great health adantage over the city dwellers in that they have ever an abundant supply of

fresh air and sunlight. These two gifts of nature, so lavishly bestowed, are not always appreciated to their fullest extent. They are two of the strongest weapons against the menace of tuberculosis, or consumption, as it is sometimes called.

But consumption is not unknown in the rural districts. The death rate is sometimes as great in these sections as in the more crowded localities, chiefly because of carelessness or indifference

Few, indeed, are the farm houses or the homes in the smaller cities and sleeping porch. On the contrary, we ing rooms in the home are shut tight in the mistaken belief that night air is harmful,

This paves the way for disease, especially tuberculosis, which generally at-
